Rohan Mehta

Bengaluru, India | +91 98765 43210 | rohan.mehta@email.com | linkedin.com/in/rohanmehta | github.com/rohanmehta
SOFTWARE ENGINEER | BACKEND & DATA SYSTEMS

PROFILE SUMMARY

Software engineer with 3+ years of experience building backend services, data pipelines and internal automation for SaaS products. Strong in Python, SQL, FastAPI, PostgreSQL and AWS, with a track record of improving system reliability, query performance and engineering workflows.

EDUCATION

- Indian Institute of Technology, Hyderabad — B.Tech., Computer Science & Engineering — 2023 — CGPA 8.6/10
- Class XII, CBSE — 92% — 2019 | Class X, CBSE — 94% — 2017

PROFESSIONAL EXPERIENCE

Software Engineer | CloudGrid Technologies, Bengaluru | Jul 2023 – Present

- Built and maintained 12 Python/FastAPI microservices supporting customer billing and usage workflows for 80,000+ monthly active users.
- Redesigned 18 high-volume PostgreSQL queries and indexing strategy, reducing p95 API latency by 41% and lowering database CPU utilisation by 23%.
- Automated reconciliation between product usage and billing data, cutting a weekly 14-hour manual process to under 2 hours.
- Introduced structured logging and alerting for 5 critical services, reducing mean time to diagnose production incidents by 30%.
- Mentored 3 graduate engineers on code reviews, testing standards and deployment checklists.

Software Engineering Intern | FinEdge Labs, Hyderabad | Jan 2023 – Jun 2023

- Developed REST endpoints for a customer-risk dashboard using Python, SQL and Redis.
- Added unit and integration tests for 35+ API scenarios and documented local development setup for new engineers.

SELECTED PROJECTS / CASE EVIDENCE

Demand Forecasting Pipeline | Python, Pandas, Airflow, PostgreSQL

- Built a reproducible ETL pipeline for 2.4 million historical sales records, with scheduled validation and automated anomaly checks.
- Compared baseline moving-average and gradient-boosting approaches; best model reduced validation MAPE from 18.4% to 11.9%.

Customer Support Search | Python, Elasticsearch

- Created a searchable prototype over 50,000 support tickets and reduced median retrieval time from 12 seconds to under 2 seconds in testing.

SKILLS

Python, SQL, FastAPI, Django, PostgreSQL, Redis, AWS, Docker, Git, REST APIs, Airflow, Pandas, PyTest, Elasticsearch

CERTIFICATIONS

AWS Certified Cloud Practitioner | SQL Advanced — HackerRank | Data Structures & Algorithms coursework

LEADERSHIP / ACHIEVEMENTS

Winner, Institute Hackathon 2022 (team of 4) | Teaching Assistant, Database Systems | 2 open-source bug fixes merged
