SECTION 01

50 AI Prompts for Freshers

Practical prompts for targeting roles, resumes, profiles, applications, networking and interviews.

How to Get Better Results from These Prompts

The prompt is only half the system. Better inputs produce more useful outputs.

Five rules

Give AI your real facts. Ask it to separate evidence from inference. Never accept invented achievements. Verify current company and vacancy information. Keep your final wording natural and defensible.

Use a three-pass method: 1) AI generates possibilities, 2) you correct the facts, 3) AI polishes the version you can defend.

Prompt 01 — Choose a target role

Use this prompt when you need help with choose a target role.

I am a fresher with [DEGREE], [SKILLS], [PROJECTS]. Based only on this information, suggest 5 realistic entry-level job families in India. Explain what evidence I already have for each and what gap I should close. Do not invent experience.

Prompt 02 — Decode a job description

Use this prompt when you need help with decode a job description.

Analyse this job description. Extract the title, responsibilities, must-have skills, preferred skills, tools, recurring keywords, eligibility requirements and likely interview topics. Separate explicit requirements from reasonable inferences.

Prompt 03 — Compare my profile to a JD

Use this prompt when you need help with compare my profile to a jd.

Compare my resume with this job description. Create MATCHED, PARTIAL MATCH, TRAINABLE GAP and NOT CLAIMABLE sections. Use only facts in my resume. Then give the 5 highest-impact truthful changes.

Prompt 04 — Find adjacent job titles

Use this prompt when you need help with find adjacent job titles.

My target is [ROLE]. My skills are [SKILLS]. Generate 25 realistic adjacent job titles used in India for entry-level candidates. Group them by function and explain the overlap.

Prompt 05 — Build job-search queries

Use this prompt when you need help with build job-search queries.

Create 30 job-search queries for [ROLE] in [LOCATIONS]. Include exact-title, adjacent-title, skill-led, industry-led and location combinations.

Prompt 06 — Find transferable skills

Use this prompt when you need help with find transferable skills.

Here are my college projects, internships and activities: [PASTE]. Extract transferable skills relevant to [ROLE]. For each skill, cite the evidence from my text.

Prompt 07 — Evidence inventory

Use this prompt when you need help with evidence inventory.

Turn these experiences into an evidence inventory: experience, task, tool, output, result, skill demonstrated and interview story potential. Do not add facts.

Prompt 08 — Resume structure

Use this prompt when you need help with resume structure.

Based on this target role and my background, propose a one-page fresher resume structure. Prioritise sections by relevance.

Prompt 09 — Resume summary

Use this prompt when you need help with resume summary.

Write 5 versions of a 2–3 line resume summary for [ROLE] using only my facts. Avoid generic adjectives and invented achievements.

Prompt 10 — Resume keyword map

Use this prompt when you need help with resume keyword map.

Extract the 20 most relevant keywords from this job description and group them into skills, responsibilities, tools and outcomes.

Prompt 11 — Resume bullet builder

Use this prompt when you need help with resume bullet builder.

Turn this real task into 3 resume bullets. First ask up to 3 questions if information is missing. Do not invent numbers, tools or results.

Prompt 12 — Weak-to-strong bullet

Use this prompt when you need help with weak-to-strong bullet.

Rewrite these resume bullets to be clearer and more specific while preserving every factual claim. Do not add metrics.

Prompt 13 — ATS check

Use this prompt when you need help with ats check.

Review my resume for readability, section clarity, keyword alignment and possible ATS parsing problems. Give changes without claiming that any ATS will definitely reject it.

Prompt 14 — Skills section

Use this prompt when you need help with skills section.

From my resume and target JD, recommend 8–12 skills I can honestly list. Separate skills supported by evidence from skills I should learn before listing.

Prompt 15 — Project description

Use this prompt when you need help with project description.

Turn this college project into a professional resume entry: problem, approach, tools, output and result. Keep it truthful.

Prompt 16 — Portfolio idea

Use this prompt when you need help with portfolio idea.

Suggest 5 small portfolio projects for a fresher targeting [ROLE]. Each must be completable in 1–2 days and produce a shareable artifact.

Prompt 17 — Portfolio critique

Use this prompt when you need help with portfolio critique.

Critique this portfolio/project for an entry-level [ROLE]. Identify what demonstrates job-relevant ability, what is superficial and what should be improved.

Prompt 18 — LinkedIn headline

Use this prompt when you need help with linkedin headline.

Create 10 LinkedIn headline options for a fresher targeting [ROLE], using only my actual skills and evidence.

Prompt 19 — LinkedIn About

Use this prompt when you need help with linkedin about.

Write a concise first-person LinkedIn About section using my resume. Make the target role obvious. Avoid inflated claims.

Prompt 20 — Naukri profile

Use this prompt when you need help with naukri profile.

Create a Naukri profile headline, summary and skill list for [ROLE] using only my background.

Prompt 21 — Recruiter keywords

Use this prompt when you need help with recruiter keywords.

Identify natural recruiter-search keyword clusters for my target role and explain where each cluster should appear in my profile.

Prompt 22 — Profile consistency

Use this prompt when you need help with profile consistency.

Compare my resume, LinkedIn and Naukri text. Identify contradictions, missing skills and inconsistent job titles.

Prompt 23 — Company research

Use this prompt when you need help with company research.

For [COMPANY] and [ROLE], summarise business model, customers, products, recent public developments and likely role priorities. Clearly separate verified facts from interpretation.

Prompt 24 — Company interview questions

Use this prompt when you need help with company interview questions.

Based on this company and job description, generate 15 likely interview questions and explain what evidence a strong fresher answer should contain.

Prompt 25 — Networking list

Use this prompt when you need help with networking list.

Help me define a 30-person networking list for [ROLE]: alumni, employees, recruiters, former interns and relevant professionals. Give search criteria, not fabricated names.

Prompt 26 — Connection message

Use this prompt when you need help with connection message.

Draft a 70-word LinkedIn connection message to a professional in [FUNCTION]. Mention one genuine point of relevance and ask one easy question. Do not ask for a job.

Prompt 27 — Follow-up message

Use this prompt when you need help with follow-up message.

Write a short, polite follow-up for my previous professional message. Keep it low-pressure and do not sound automated.

Prompt 28 — Referral request

Use this prompt when you need help with referral request.

Draft a referral request only after an existing professional conversation. Make it easy for the person to decline and avoid entitlement.

Prompt 29 — Application tracker

Use this prompt when you need help with application tracker.

Create a job-application tracking schema with fields for company, role, source, date, resume version, contact, follow-up, interview stage and outcome.

Prompt 30 — Application prioritisation

Use this prompt when you need help with application prioritisation.

Given these vacancies, help me classify them as close fit, adjacent fit or stretch fit using only the stated requirements and my evidence.

Prompt 31 — Cover-letter outline

Use this prompt when you need help with cover-letter outline.

Create a short cover-letter structure for this job. Highlight only evidence that directly supports the role.

Prompt 32 — Tell me about yourself

Use this prompt when you need help with tell me about yourself.

Using my resume and target JD, create a 60-second answer structure for 'Tell me about yourself'. Keep it natural and evidence-based.

Prompt 33 — Why this role

Use this prompt when you need help with why this role.

Generate a 45-second answer to 'Why this role?' using my background and the responsibilities in the JD. Do not flatter the company or invent motivations.

Prompt 34 — Why this company

Use this prompt when you need help with why this company.

Create a factual answer framework for 'Why this company?' based on public company information I provide and the job description.

Prompt 35 — Why should we hire you

Use this prompt when you need help with why should we hire you.

Create 3 evidence-based answer versions connecting my strongest relevant capability, proof and learning attitude.

Prompt 36 — Strengths question

Use this prompt when you need help with strengths question.

Identify 3 strengths supported by my actual experiences and give a STAR-style example for each.

Prompt 37 — Weakness question

Use this prompt when you need help with weakness question.

Help me choose a genuine, non-fatal development area from my background and frame how I am improving it without using a cliché.

Prompt 38 — STAR story builder

Use this prompt when you need help with star story builder.

Turn this real experience into Situation, Task, Action and Result. Ask questions if needed. Do not invent facts. Produce 60-second and 120-second versions.

Prompt 39 — Behavioural interview

Use this prompt when you need help with behavioural interview.

Act as an interviewer for [ROLE]. Ask one behavioural question at a time. After each answer, critique relevance, evidence, structure and concision.

Prompt 40 — Technical interview

Use this prompt when you need help with technical interview.

Generate entry-level technical questions for [ROLE] based on this JD. Start easy, then increase difficulty. Include model answer criteria, not memorised answers.

Prompt 41 — Mock interview

Use this prompt when you need help with mock interview.

Run a 10-question mock interview for [ROLE]. Do not reveal the next question early. Give a final report on my strongest and weakest areas.

Prompt 42 — Interview feedback

Use this prompt when you need help with interview feedback.

Here is my interview transcript. Identify unclear answers, unsupported claims, filler phrases, missed opportunities and stronger ways to structure the same truthful answer.

Prompt 43 — Salary discussion

Use this prompt when you need help with salary discussion.

Help me prepare a factual salary-expectation response for an entry-level role using the salary range in the job posting if provided. Avoid inventing market data.

Prompt 44 — Interview questions to ask

Use this prompt when you need help with interview questions to ask.

Generate 10 thoughtful questions I can ask the interviewer for this specific role. Prioritise work, expectations, training and team context.

Prompt 45 — Rejection analysis

Use this prompt when you need help with rejection analysis.

I was rejected after applying/interviewing. Help me analyse the known facts, identify what is uncertain, and create 3 experiments for my next applications.

Prompt 46 — Job-search bottleneck

Use this prompt when you need help with job-search bottleneck.

Here are my last 14 days of applications, replies and interviews. Identify where the funnel is weakest and suggest 3 changes to test.

Prompt 47 — Daily plan

Use this prompt when you need help with daily plan.

Create a 90-minute job-search routine for me based on my target role, available time and current pipeline. Prioritise high-value actions.

Prompt 48 — 14-day plan

Use this prompt when you need help with 14-day plan.

Build a 14-day job-search sprint with daily outputs, application targets, networking actions and interview practice based on my profile.

Prompt 49 — AI fact-check

Use this prompt when you need help with ai fact-check.

Audit this AI-generated resume text against my original facts. Mark every statement as supported, unsupported or ambiguous. Remove unsupported claims.

Prompt 50 — Personal job-search coach

Use this prompt when you need help with personal job-search coach.

Act as my job-search coach for the next 14 days. Each day ask what I completed, review the numbers, identify the bottleneck and give me the next 3 highest-value actions. Never invent opportunities or credentials.

SECTION 02

AI Job-Search Toolkit for Experienced Professionals

Positioning, evidence, senior-level applications, networking, interviews, transitions and offers.

How Experienced Candidates Should Use This Toolkit

The experienced job search is different from a fresher search. Your strongest asset is not the number of years; it is the evidence of decisions, outcomes and scope.

The positioning equation

Target role + business problem + strongest evidence + relevant scope = professional positioning.

If your resume says what you did but not why it mattered, you are probably underselling your experience.

Chapter 1 — Build Your Career Evidence Inventory

Before rewriting the resume, capture the full value of your career.

Capture six dimensions

Business outcome • responsibility • scale • complexity • stakeholders • tools/systems.

Dimension	Examples
Outcome	Revenue, savings, growth, quality, speed, retention
Scale	Team size, geography, customers, budget, volume
Complexity	Multiple stakeholders, ambiguity, tight timelines
Ownership	What you personally decided or changed
Systems	ERP, CRM, analytics, automation, process tools
Leadership	Coaching, hiring, influencing, cross-functional work

AI prompt

Audit my career history for evidence of business impact. For every role, ask up to five questions that would uncover measurable outcomes, scope, complexity, ownership and stakeholder impact. Do not invent metrics.

Chapter 2 — Create a Senior-Level Value Proposition

Your summary should explain the value you bring, not repeat your designation.

Formula

I help [type of business/team] achieve [business outcome] through [capabilities], with experience across [scope/industry/context].

AI prompt

Using only my career history, create five value-proposition options for [TARGET ROLE]. Each must identify my functional expertise, strongest business outcome and relevant scope. Avoid generic leadership claims.

Chapter 3 — Achievement-Based Resume

Convert responsibilities into evidence without exaggeration.

CAR + scope

Challenge → Action → Result. Add scale where it changes the meaning.

Task-style	Evidence-style
Managed reporting	Built monthly performance reporting used in management reviews
Handled customers	Managed a portfolio of B2B customers and coordinated renewals
Led projects	Led a cross-functional implementation across operations, finance and technology

AI prompt

Rewrite my experience bullets using CAR. Preserve all facts. Ask me for missing context before adding specificity. Do not create metrics, percentages, team sizes or business outcomes.

Chapter 4 — Resume Architecture by Career Level

Different levels need different emphasis.

Level	Emphasis
2–4 years	Execution + ownership + measurable outcomes
5–8 years	Scope + cross-functional impact + problem solving
8+ years	Business outcomes + leadership + strategic decisions + organisational influence

Use the level as a guide, not a rigid rule. The job description should determine what evidence gets the most space.

Chapter 5 — LinkedIn Positioning

Make your profile readable to both humans and search systems.

Headline formula

Function | Specialisation | Business outcome / industry | Key capability

Featured section

Use projects, case studies, presentations, public writing or professional achievements that are safe to share.

AI prompt

Compare my LinkedIn profile with my target job descriptions. Identify missing role language, unclear positioning, weak evidence and contradictions. Then propose precise edits without inventing achievements.

Chapter 6 — Target-Company Strategy

Experienced professionals benefit from account-based job searching.

Build a 25-company list

Prioritise companies where your function, industry experience, technology exposure or business problem knowledge is relevant.

Tier	Purpose	Action
A	Strong role + evidence fit	Warm outreach + targeted application
B	Good adjacent fit	Targeted application + selected outreach
C	Learning/stretch	Apply selectively after closing obvious gaps

AI prompt

Given my career history and target function, help me build a 25-company target-account framework. Define what makes a company a strong fit and what public signals I should research. Do not fabricate current openings.

Chapter 7 — Networking That Uses Expertise

The strongest reason for an experienced person to contact someone is often a useful professional question.

Conversation angles

Industry transition • functional expertise • technology adoption • leadership lessons • shared professional context • specific role understanding.

AI prompt

Create three networking messages for an experienced professional with [BACKGROUND] targeting [ROLE]. Each should establish genuine professional relevance, ask one specific question and avoid requesting a job in the first message.

Chapter 8 — Recruiter Conversations

Be ready for a 10-minute screening call.

Prepare six answers

What are you looking for? Why now? What is your strongest relevant achievement? What scope do you own? Why are you leaving/considering a move? What are your compensation expectations?

AI prompt

Act as a recruiter screening me for [ROLE]. Ask 12 questions covering motivation, role fit, achievements, scope, availability and compensation. After each answer, flag unsupported claims and missing evidence.

Chapter 9 — Senior-Level Interview Stories

Move beyond basic STAR to judgement and trade-offs.

Use STAR + Decision + Trade-off

Situation • Task • Action • Result • Key decision • Trade-off • What you would do differently.

Build these 10 stories

Major achievement • difficult stakeholder • failure/recovery • conflict • cost/savings • customer issue • process improvement • leadership • ambiguity • strategic decision.

AI prompt

Turn this real professional experience into a senior-level interview story. Preserve facts. Highlight the decision I made, alternatives considered, trade-off, result and lesson. Ask questions before drafting.

Chapter 10 — Case & Problem-Solving Interviews

Some experienced roles test how you think, not only what you have done.

Simple structure

Clarify the objective → identify drivers → form hypotheses → prioritise → recommend → state risks and next steps.

AI prompt

Create a realistic case interview for [ROLE/INDUSTRY]. Give me only the initial case. Ask questions one at a time and provide new information only when I request it. Evaluate my structure, assumptions and recommendation.

Chapter 11 — Career Transition Strategy

A career change needs a bridge, not an apology.

Three-part narrative

What I have built → what transfers → what I am deliberately adding.

AI prompt

Map my previous role to [NEW ROLE]. Separate directly transferable evidence, partially transferable evidence and genuine gaps. Create a truthful transition story and a 90-day learning plan for the gaps.

Chapter 12 — Compensation & Offer Preparation

Prepare your position before the offer conversation.

Know your variables

Current compensation • target range • role scope • location • benefits • variable pay • joining timeline • flexibility.

AI prompt

Help me prepare for a compensation conversation using only the salary information I provide. Create three scripts: expected range, counter-offer and non-salary trade-offs. Do not invent market benchmarks.

Chapter 13 — Job-Search Funnel for Experienced Candidates

Measure the stage where your search is leaking.

Signal	Possible issue	Experiment
Few recruiter replies	Positioning/profile	Rewrite headline + first third of resume
Applications rejected early	Role fit/resume	Compare 10 JDs against evidence
Recruiter screens but no interviews	Interview story	Run 3 mock screens
Interviews but no offers	Depth/fit/decision evidence	Debrief every interview
Many conversations, few applications	Targeting	Tighten target-company list

AI prompt

Analyse my last 30 job-search outcomes. Identify the strongest evidence and the weakest stage of my funnel. Propose three small experiments, each with a success metric.

Chapter 14 — The 14-Day Experienced-Professional Sprint

A repeatable operating rhythm.

Days	Focus
1–2	Target role + value proposition
3–4	Career evidence + achievement resume
5–6	LinkedIn + recruiter discoverability
7–8	25 target accounts + research
9–10	Warm outreach + targeted applications
11–12	Senior interview stories + mock interview
13	Follow-ups + debriefs
14	Funnel review + next-cycle experiments

Do not confuse seniority with seniority labels. The strongest evidence is the scale of the problem you can solve and the outcomes you can produce.

Experienced-Professional AI Prompt Library

A compact set of prompts to reuse after the main chapters.

Career audit: “Review my last five years of work and identify recurring strengths, business problems I repeatedly solve, evidence of increasing scope and potential target roles. Ask questions before making assumptions.”

Promotion story: “Using only my evidence, create a narrative showing how my responsibilities and impact expanded over time.”

Executive summary: “Rewrite my professional summary for [ROLE] with emphasis on outcomes, scope, domain and decision-making. No generic adjectives.”

Interview challenge: “Challenge my answer as a sceptical hiring manager. Ask for evidence, trade-offs, ownership and measurable results.”

Reference preparation: “Create a factual one-page summary of achievements and responsibilities that a professional reference could use to accurately describe my work.”

Final Operating Checklist

Before starting another search cycle, verify the system.

Area	Ready when…
Target	One primary role + adjacent roles defined
Positioning	You can explain your value in 30 seconds
Resume	Bullets show outcomes and scope
Profile	LinkedIn and resume tell the same story
Target accounts	25 companies researched
Network	Relevant contacts are tracked
Interviews	10 stories are ready
Pipeline	Every application has a status and next action

The goal is not to apply everywhere. It is to become increasingly precise about where your experience creates value and to make that value easy for the right employer to recognise.

SECTION 03

Job Seeker Templates & Trackers

Printable worksheets, trackers, outreach scripts, story banks and a 14-day action dashboard.

How to Use This Workbook

Use one page at a time. Complete the sheets before increasing application volume.

A tracker is useful only if you update it. Spend 5 minutes at the end of each job-search session recording what happened and what happens next.

01 — Target Role Worksheet

Define the search before you open a job board.

Field	Your answer
Primary target role	
Two adjacent roles	
Preferred locations	
Remote / hybrid / office	
Minimum qualification	
Top skills	
Strongest proof points	
Target industries	
Salary/compensation constraints	

02 — Target Company Sheet

Build a focused list instead of an endless list.

Company	Why relevant	Target role	Contact	Status

03 — Job Application Tracker

Track the whole funnel.

Date	Company	Role	Source	Resume	Status	Next action

04 — Networking Tracker

Remember every conversation and the next step.

Person	Role/company	Context	Contacted	Reply	Next action

05 — Resume Evidence Bank

Capture facts before asking AI to rewrite them.

Experience	Task	Tool	Outcome	Metric/scope

06 — STAR Story Bank

Build stories from real experiences.

Story	Situation	Task	Action	Result
1				
2				
3				
4				
5				
6				
7				
8				

07 — Interview Debrief

Record what actually happened.

Area	My answer	What worked	Improve
Tell me about yourself			
Role knowledge			
Behavioural story			
Technical/functional			
Why company			
Questions asked			

08 — Weekly Funnel Review

Use data instead of emotion to diagnose the search.

Metric	This week	Last week	Change
Targeted applications			
Outreach messages			
Replies			
Recruiter screens			
Interviews			
Final stages			

09 — Follow-Up Scripts

Adapt these to the real context.

Application follow-up

Hi [Name], I recently applied for the [Role] position. My experience in [relevant evidence] aligns with the role’s focus on [responsibility]. I remain interested and would be happy to provide any additional information.

Interview follow-up

Thank you for speaking with me about the [Role] position. I particularly appreciated our discussion about [topic]. The conversation reinforced my interest in the opportunity.

Networking follow-up

Thank you for the advice on [topic]. Your point about [insight] was especially useful, and I’ll apply it as I continue targeting [role/function].

10 — 14-Day Action Calendar

Turn the system into daily behaviour.

Day	Main action	Done
1	Define target role + 30 companies	☐
2	Build evidence inventory	☐
3	Create master resume	☐
4	Create tailored variants	☐
5	Fix LinkedIn/Naukri	☐
6	Build proof asset	☐
7	Build network list	☐
8	Send targeted applications	☐
9	Send outreach	☐
10	Expand adjacent search	☐
11	Build STAR stories	☐
12	Run mock interviews	☐
13	Follow up	☐
14	Review funnel + plan next cycle	☐

11 — Personal Job-Search Dashboard

Keep the important numbers visible.

Area	Target	Actual
Primary role	1	
Target companies	30+	
Resume variants	2–3	
Proof assets	1–2	
Relevant contacts	30	
STAR stories	8–10	
Targeted applications	Your sustainable quota	
Interviews	Track actual	

12 — Final Review

Decide what to change before the next cycle.

Question	Your answer
Where did I get the most replies?	
Which roles repeatedly rejected me?	
Which skills appeared most often?	
What evidence is missing?	
Which outreach messages worked?	
What will I stop doing?	
What will I test next?
